Do you, or does anyone in your household, have a financial or employment interest in any healthcare related business?:

No

Should the state be advertising and otherwise promoting the vaccine using taxpayer dollars? Why or why not?:

Tax dollars have been used before on education regarding any widespread health issue. Such as smoking wearing seatbelts and other types of vaccines so I think as long as it's done in that same way and it's just education on both sides meaning the pros and the cons of getting a vaccine. With that being said the commercials that I see now go way above and beyond health care commercials in the past. They are more frequent and they are highly slanted toward getting the vaccine and make it sound like there is not a negative side. I believe the vaccine is a personal choice. I do feel that it is part of governments responsibility to inform us of any health issues that could affect us much in the same way they did when they raised money for polio. I simply disagree with not informing taxpayers about how this vaccine is different from say a polio vaccine it's an MRA vaccine it's newer technology has not it been around for 100 years as they imply. There are other things that we can do to protect ourselves from Covid such as boost immune system have a better diet exercise take vitamins. If we are going to have taxpayer dollars pay for commercials that inform us on vaccines they should also inform us of the alternative methods that we can use to protect ourselves.

Should the new legislature re-elect or replace current leadership?:

Replace current leaders

Did ADH and ABC have authority to issue the mask-related fines to small businesses last year?:

No

Should the legislature force ABC and ADH to return the mask-related fines collected last year?:

Yes

What is your position on SB 730 (the Garner bill)?:

For

What is your position on SB 731 (the Ballinger bill)?:

For

What is your position on SB 732 (the Blake Johnson bill)?:

For

What is your position on SB739 (the Hammer bill)?:

For

Do you believe the state has to respect and otherwise enforce unconstitutional federal mandates? At what point does state sovereignty apply?:

I believe our constitution was always intended for states to have more power than federal government however due to taxes and the power of the federal government in the form of money they are able to control states by controlling the money they give to states and I disagree with that I've always disagreed with that.

Are you, or is anyone in your household, a public school teacher or otherwise employed by a public school?:

No

Do you believe that CRT, or some form of it, is currently being taught in Arkansas schools?:

No

What is your position on CRT?:

I believe critical race theory will only divide us more. I learned about slavery in school I also learned about the holocaust in school I think school should teach us the facts the historical facts and I think turning it into a social issue will only corrupt young impressionable minds.

What is your position on school choice? If you support it, what form do you support (e.g. complete choice, limited vouchers, choice limited to other public schools)?:

I do not have children so education would be an area where I would consult with my strong conservative

colleagues with more education experience. I am PRO-SCHOOL CHOICE!

School choice allows parents to make choices for their children based on their children's unique needs, interests, and learning styles based on the parents values and how they choose to have their child educated.

School choice eliminates the need for parents to pay twice for their children's education; once in tax dollars and again in tuition costs.

The government-run education system isn't working. School Choice and competition would improve the public school system by catering to what the parents chooses rather than the government agenda.

Should any abortions be legal in the state of Arkansas?

Please explain.:

I was adopted in 1968 before abortion was legal so naturally I am 100% against it because to say that I wasn't a human being just because I wasn't wanted is crazy however I do think that if we outlaw abortion we do need non-lethal choices that are easier to access for young teenage mothers such as adoption so that is a subject that is very close to my heart and making adoption less expensive more accessible and easier I would also be in favor of using tax dollars for public service announcements and showing the success stories of adoption.

Are you in favor of the concept of limited government, and do you commit to support the Republican Party platform as written?:

Yes, 100%

Do you support reducing / eliminating the state income tax? If so, what process would you support to accomplish it (e.g. gradual reduction, drastically cut state government, increase sales or property tax)?:

I am for eliminating the income tax as long as it does not increase other taxes. In Arkansas we are taxed in many ways. I would also like to eliminate or reduce other types of Arkansas taxes like property and sales tax. We have some of the highest sales tax in our region and we tax a car every time it is sold. Looking at ways lower

Government spending and the size of government is the best was to save taxes payers on all taxes in Arkansas.

Have you accepted (or would you accept) money from Tyson, Walmart, the state chamber, or the hospital lobby?:

No

What bill should the legislature pass immediately to do the most good for Arkansans?:

There are so many good issues out there it's hard for me to say. I would say pro life is a very important one because lives are at stake. But I also think reducing taxes and saving tax payers money is important because lives are at stake especially with the current state of the economy.

Why did you choose to run specifically for this office and not another one?:

I never intended to run for office and I am not a seasoned politician by no means I am a small business owner I am running for house representative in district 56 because a there's a democrat incumbent and be my republican opponent is a 26 year old lawyer that served with Asa, and attended the Clinton School of Public Service. I don't believe that he is a Strong conservative Christian and I think he would be wrong for the state. I want to be a part of building a better government that is for the people.

On which legislative committee are you most interested in serving, and why?:

Public health and welfare And revenue taxation
I believe these committees would best suit my strengths
has a business owner and has someone that is pro life
and against government overreach

What is your top priority once in office?:

Controlling government overreach And making adoption easier and more affordable,

Is there anything else you would like to share?:

I am a very strong conservative. Passionate about freedom.

If you want to know more about me please visit my

website at Kimforhouse.com and look at my convictions.
