

Doc Washburn Statement on Supreme Court Leak

An apparent leak of a draft U.S. Supreme Court decision indicates the Court may finally do what it should have done decades ago – overturn Roe v. Wade. All lives matter, including those of the unborn. All lives are precious in the eyes of God. Abortion was murder in 1973 and it still is today. I pray the Supreme Court justices have the fortitude to stand for human life by overturning this barbaric decision.

This leak is outrageous and unprecedented. There's no level too low for abortion enthusiasts to stoop to keep the ritual of slaughter of the innocents from being criminalized. After 49 years of legalized bloodshed, this should surprise no one. Chief Justice Roberts must conduct an investigation to determine what (if any) laws were broken by the leaker(s). In normal times, the FBI should be the lead investigative agency, but I fear the Bureau has been hopelessly compromised and politicized. Here's a good explanation of how serious the leak is:
